

Action plan submitted by Keziban Armağan for İbrahim Şener Anaokulu - 11.01.2023 @ 21:20:55

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- › It is very good that all your school devices are virus protected. Make sure you also have included a paragraph on virus protection in both your school policy and your Acceptable Use Policy, and ensure that staff and pupils rigorously apply school guidelines. If you need further information, check out the fact sheet on Protecting your devices against malware at www.esafetymalware.com.
- › It is good practice that your ICT services are regularly reviewed, updated and removed if no longer in use.

Pupil and staff access to technology

- › The fact that staff and pupils are allowed to use USB memory sticks in your school following permission, would require that all staff concerned receive adequate training to be able to know when they can be used safely. Is this the case? To keep your systems secure whilst allowing staff and pupils you also need to include the ground rules in your Acceptable Use Policy. Check the fact sheet on Use of removable devices at www.esafetymalware.com to make sure you cover all security aspects.
- › It is good that in your school computer labs can easily be booked. Consider the option of integrating other digital devices into the lessons as using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.

Data protection

- › You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.
- › It is good that your school records are stored in a safe environment, it is also necessary that they are archived and disposed with in line with the Data Protection Act. Ensure that a good records management system is put in place. Check the according fact sheet for more information.

Software licensing

- › It is important to ensure that all new staff are briefed about the effective processes you have for the installation of new software. This will mean that the security of your systems can be maintained and that staff can try out new software applications that will help teaching and learning.
- › It is good practise that the member of staff responsible is fully aware of installed software and their license status.

IT Management

- › It is good practice to ensure that the person in charge of the ICT network is fully informed of what software is on school-owned hardware and this should be clearly indicated in the School Policy and the Acceptable Use Policy. The person responsible for the network needs to be able to guarantee conformity with licensing requirements and that new software won't interfere with network operation.
- › In your school only the head master and/or IT responsible can acquire new software. Consider putting a system into place where teachers can ask for new software in a non-bureaucratic and timely fashion. This allows teachers to create a more engaging lesson without the temptation of unauthorized copying and its inherent dangers and costs.

Policy

Acceptable Use Policy (AUP)

- › It is good that you have an Acceptable Use Policy for all members of the school community. Regularly review the AUP to ensure that it is still fit for purpose; to ensure that your AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at www.esafetylevel.eu/group/community/acceptable-use-policy-aup-.
- › It is good practise that whenever changes are put into place in your school, the school policies are revised if needed. Note though, that also changes outside the school can affect policies such as new legislations or changing technologies. Therefore please review your policies at least annually.

Reporting and Incident-Handling

- › Are all staff familiar with the procedure for dealing with material that could potentially be illegal? Is there a named person from the school senior leadership team who takes overall responsibility in this type of case? The procedure needs to be clearly communicated to all staff in the School Policy, and to staff and pupils in the Acceptable Use Policy. Remember to report and suspected illegal content to your national INHOPE hotline (www.inhope.org).
- › It is good practice to log cyberbullying incidents that occur in your school centrally, as you are contributing to building a data base of successful incident handling practices from schools across Europe that you and others can use in future. Make sure that pupils sign up to anti-bullying guidelines in your Acceptable Use Policy.

Staff policy

- › As new technology and online practices emerge the borders of acceptable practice are constantly blurred. This

is something that needs to be discussed at staff meetings often. Could you create a tutorial on professional online conduct of staff and upload it to your school profile via your [My school area](#) so that other schools can benefit from your good practice?

- › In your school user accounts are managed in a timely manner. This is important as it decreases the risk of misuse.

Pupil practice/behaviour

- › You have defined electronic communication guidelines in your Acceptable Use Policy and this would be a useful example of good practice for other schools. Can you create a tutorial about electronic communication guidelines for pupils and upload it to your school profile via your [My school area](#) so that other schools can benefit from your experience.
- › It is good that pupils have the possibility to shape school activities when discussing eSafety, be it extra-curricular and curricular ones, based on what is going on in their daily lives. This way they will be more engaged and it also allows the teacher to recognise real life issues.

School presence online

- › Check the fact sheet on Taking and publishing photos and videos at school (www.esafetylevel.eu/group/community/taking-and-publishing-photos-and-videos-at-school) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your [My school area](#) so that other schools can learn from your good practice.
- › We recommend that you specifically nominate a web-experienced staff member to periodically check the school's online reputation. Monitoring such an important aspect on an ad hoc basis only is insufficient. Remember that this is the image that prospective parents will receive when they search for your school online.

Practice

Management of eSafety

- › In your school, teachers are responsible for their own pupils' online activity. There are many network security and user privacy, audit and procedural tool checks and balances that need to take place to ensure the safety of your pupils and the school networks, and these should be laid down in your School Policy. See our fact sheet on School Policy at www.esafetylevel.eu/group/community/school-policy.

To ensure this happens as efficiently and often as necessary, we advise that the Principal of your school appoints one individual staff member to look after eSafety management in the school. This person will be responsible for seeing that all aspects included in your School Policy are discussed and looked at with other teachers as well as with pupils in the classroom.

To ensure that every staff member, pupil and parent is aware of her or his online rights and responsibilities, see the fact sheet on Acceptable Use Policy (www.esafetylevel.eu/group/community/acceptable-use-policy-aup-).

- › Technology develops rapidly. It is good practice that the member of staff responsible for ICT is regularly sent to trainings and/or conferences to be aware of new features and risks. Check out the [Better Internet for Kids portal](#) to stay up to date with the latest trends in the online world.

eSafety in the curriculum

- › It is good that eSafety is taught as part of the curriculum in your school. Ensure that all staff are delivering eSafety education where appropriate throughout the curriculum and not just through ICT or Personal Social and Health lessons. You/your staff may find some useful ideas and resources in the fact sheet Embedding eSafety in the curriculum at www.esafetymodel.eu/group/community/embedding-online-safety-in-curriculum.
- › It is good that you are making a specific reference to sexting within your child protection policy as this is a growing issue that many young people are having to deal with. It is also important to ensure that you are providing appropriate education for pupils about this issue.

Extra curricular activities

- › Gather feedback from pupils to see what sort of additional eSafety support they would benefit from outside curriculum time. Could they be involved in delivering some of this to their peers? Check the resource section on the eSafety Label portal to find resources that will help them do this; check out the fact sheet on Pupils' use of online technology outside school at www.esafetymodel.eu/group/community/pupils-use-of-online-technology-outside-school.
- › Consider sharing the information you have about your pupils' online habits with other schools through the eSafety Label community. You could, for example, upload your latest survey findings on pupils' online habits to your school profile via your [My school area](#).

Sources of support

- › It is good to know that other school services are involved in eSafety issues (e.g. counsellors, psychologists, school nurse). Are they also invited to contribute to developing and regular review of your School Policy? Publish a case study about how this is managed in your school on your school profile page on the eSafety Label project website, so that others can learn from your experience.
- › It is great that in your school pupils are actively encouraged to become eSafety mentors. You might want to share your approach to strengthening this network with other teachers on the eSafety Label website via the forum or your school's profile page, so that others can replicate it.

Staff training

- › It should be a real benefit to your pupils that all staff receive regular training on eSafety issues. Continue to gather feedback from staff on the medium- and long-term benefits of the training and consult the eSafety Label portal to see suggestions for training courses at www.esafetymodel.eu/group/community/suggestions-for-online-training-courses.
- › In your school knowledge exchange between staff members is encouraged. This is beneficiary to the whole school. Upload PowerPoints, documents or similar of knowledge exchanges on eSafety topics via the uploading evidence tool, accessible also via the [My school area](#).

for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.
